

HxGN dC3

Redefining physical security

Organizations worldwide are increasingly encountering heightened threats and risks due to surges in global crises, trade conflicts, political instability and the consequences of climate change. In response to these challenges, there is a growing need for holistic security concepts that effectively protect people, properties and assets.

Traditional physical security systems, however, often operate in silos and struggle to address these escalating challenges. They frequently fall short of meeting regulatory requirements, and their maintenance and operation can be both complex and costly.

To address these issues, Hexagon has developed HxGN dC3, a unified physical security technology ecosystem designed to manage the entire lifecycle of an incident and minimize its impact. This innovative solution integrates the C3 approach — command, control and collaborate — familiar from the control center environment, with advanced event detection capabilities.

HxGN dC3 security portfolio

Safeguard your world with HxGN dC3, a holistic portfolio that also leverages the power of Hexagon's broader range of solutions – delivering powerful mapping and visualization capabilities, dispatch and collaboration tools and enterprise asset management.

| HxGN dC3 Video

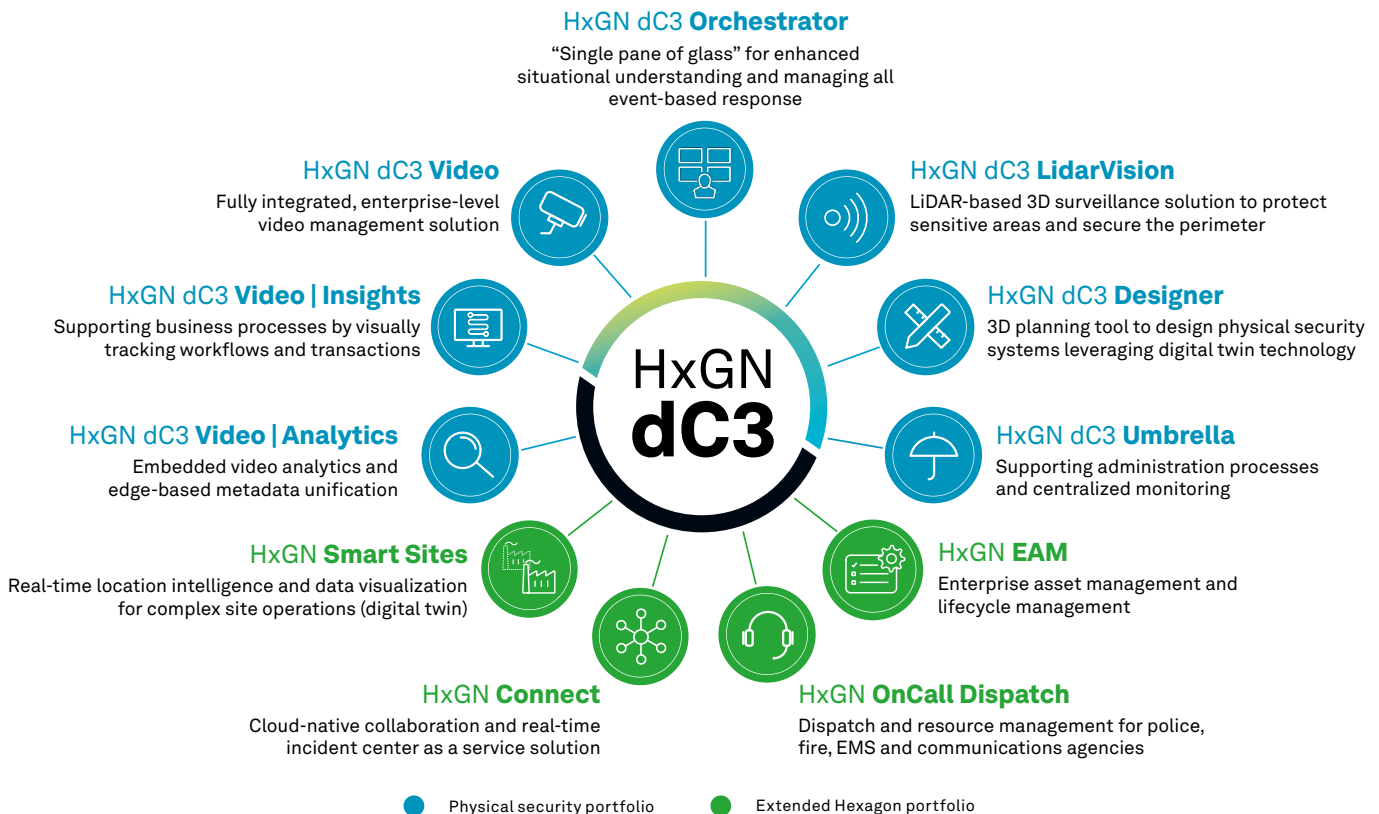

is an open-platform video management software (VMS) solution designed to meet the specific needs of enterprise-class organizations in different industries with low total costs of ownership.

[Explore HxGN dC3 Video >>](#)

| HxGN dC3 Orchestrator

is an advanced physical security information management (PSIM) solution that provides enhanced situational awareness and orchestrates detection, validation and response to minimize the impact of an incident.

[Explore HxGN dC3 Orchestrator >>](#)

| HxGN dC3 LidarVision

is innovative LiDAR-based 3D surveillance software built on volumetric detection technology. Unlike traditional perimeter protection systems, it not only protects the fence line, but also secures an entire area.

[Explore HxGN dC3 LidarVision >>](#)

| HxGN dC3 Umbrella

is a centralized administration tool that allows organizations to manage and monitor distributed video surveillance systems across a large number of sites and multiple geographies.

Hexagon is the global leader in precision technologies at any scale. Our digital twins, robotics and AI solutions are transforming the industries that shape our reality.

Hexagon's Safety, Infrastructure & Geospatial division improves the resilience and sustainability of the world's critical services and infrastructure. Our solutions turn complex data about people, places and assets into meaningful information and capabilities for better, faster decision-making in public safety, defense, transportation, government and physical security. Learn more at hexagon.com and follow us [@HexagonAB](#).
